

Onboarding promise decision brief

Decide which onboarding promise should lead the next launch.

Choosing a clearer onboarding promise - generated from analysis analysis-fixture-v3.

Executive decision

Teams value faster orientation, but trust depends on visible control and evidence.

Seven of nine participants described the first useful summary as the moment the product became valuable.

Evidence: finding-speed

Participants accepted automation when they could inspect sources and revise the output before sharing.

Evidence: finding-control

Key findings

The patterns with the clearest decision impact.

Seven of nine participants described the first useful summary as the moment the product became valuable.

Evidence: finding-speed

Participants accepted automation when they could inspect sources and revise the output before sharing.

Evidence: finding-control

Security and research leaders asked for methodology detail before relying on a generated recommendation.

Evidence: finding-enterprise

Segment differences

Where the evidence changes by audience.

Security and research leaders asked for methodology detail before relying on a generated recommendation.

Evidence: [finding-enterprise](#)

Counter-evidence

Signals that qualify the leading interpretation.

Counter-signal: Seven of nine participants described the first useful summary as the moment the product became valuable.

Evidence: finding-speed

Counter-signal: Security and research leaders asked for methodology detail before relying on a generated recommendation.

Evidence: finding-enterprise

Recommendations

Actions grounded in the current evidence, not a substitute for product judgment.

Act on this signal: Participants accepted automation when they could inspect sources and revise the output before sharing.

Evidence: finding-control

Methodology and sample

3 findings synthesized from 9 linked evidence records.

Analysis run analysis-fixture-v3 completed 2026-07-14T10:30:00.000Z.

Counts describe linked records in the analysis snapshot and do not imply statistical representativeness.

Limitations

Read the conclusions within the boundaries of the available sample.

Finding strength reflects the completed analysis snapshot; later fieldwork is not included.

Segment comparisons are directional when only a small number of evidence records are linked.

Evidence appendix

Finding and evidence identifiers retained for review.

finding-speed: evidence-01, evidence-02, evidence-03, evidence-09

finding-control: evidence-04, evidence-05

finding-enterprise: evidence-06, evidence-07, evidence-08
